SagaNatura

SAGAFEMME - For her comfort

SagaFemme was designed with women in mind, to keep their bladder and urethra healthy. SagaFemme is a powerful blend with two active ingredients: **SagaPro**, a proprietary, aqueous extract of Angelica archangelica leaves, and **Oximacro**, a clinically studied cranberry extract with high levels of PAC-A.

- SagaPro is a clinically studied herbal supplement that reduces urinary frequency in people with low bladder capacity or suffer from overactive bladder
- Bioactivity in SagaPro – calms bladder muscle contraction
- The dosage of Oximacro includes 36 mg of PAC-A, clinically researched for the prevention of urinary tract infection and treatment of such.
- Includes Vitamin C and D which are known to support the immune system

SAGAPRO effects on bladder health

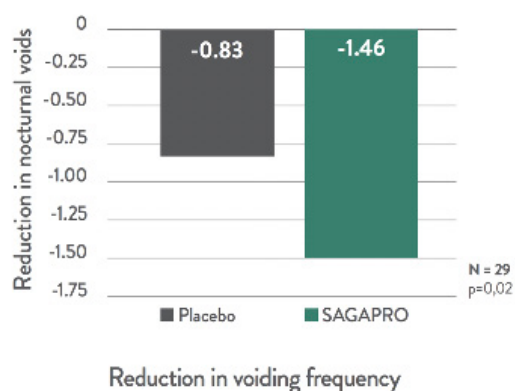

SagaNatura

Double blind placebo controlled study of Sigurdsson et al. (2013)

Increase in bladder volume

Subgroup with less than 260 ml initial volume had increased bladder volume per nocturnal void. Low bladder volume is directly related to urinary frequency.

The SAGAPRO group had an increase in bladder volume of 66 ml

Reduction in nocturnal voids

Subgroup with low nocturnal bladder capacity and not using sleep medication. The SAGAPRO group experienced a significant reduction in nocturnal bathroom visits and increased nocturnal bladder capacity

The SAGAPRO group experienced a significant reduction in nocturnal bathroom visits

SAGAPRO – preclinical studies

Ongoing research on the effect of SAGAPRO on urinary bladder muscle indicates that various compounds of the product relax the muscle. Some of those compounds are the subject of a patent application.

SagaPro contains many bioactive compounds, including 3-chlorogenic acid, 4-chlorogenic acid, 5-chlorogenic acid, rutin, isoquercitrin, 5-methoxypsoralen, 8-methoxypsoralen, 8-hydroxypsoralen, isopimpinellin, imperatorin, oxypeucedanin hydrate and others.

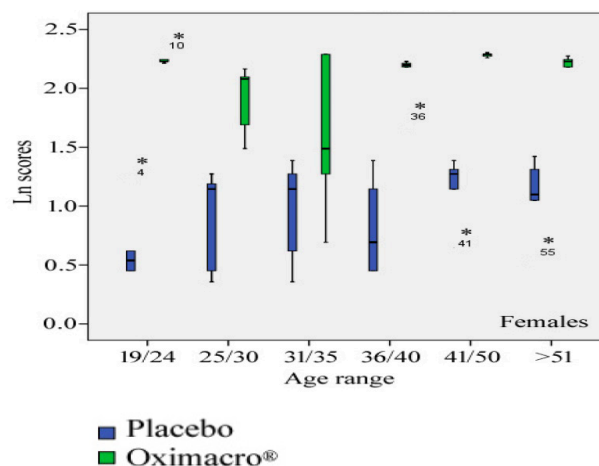

OXIMACRO® effect on urethra health

SagaNatura

A Pre-Clinical Double-Blind Controlled Study of Occhipinti et al. (2016)

Significant differences were found between placebo and Oximacro when age ranges were analysed.

Oximacro helping in recovery

After 7 days of Oximacro® and placebo administration, a table was generated based on recovered vs. not recovered volunteers; this table showed a significant difference between the Oximacro® and placebo groups.

Table 3. Contingency table.

Variables	Placebo	Oximacro®
Not recovered	35	7
Recovered	0	28

Fisher's Exact Test: $P < .001$

SAGAFEMME specification sheet

Description

Product name	SagaFemme
Brand name	KeyNatura
Suggested dosage	Two per serving
Usage	Oral

Packaging

Aluminum bottle
20 capsules per bottle

Product specification

Capsule size	0 (Zero)
Appearance	Clear shell with pale pink powder fill
Microbiological quality	Complies with regulation (EC) No. 2073/2005

Capsule fill composition (1 capsule)

SagaPro® angelica leaf extract	100 mg
Oximacro® cranberry extract	120 mg
Other ingredients: Rice flour, magnesium stearate, bamboo extract.	

Other information

Irradiation	No
GMO	No
Organic	No
Suitable for Vegetarians	No
Suitable for Vegans	No
Best before date	2 years from production
Storage conditions	Store in dry area at room temperature
